

# NAVIGATOR

**CREeping RED FESCUE**

## **NAVIGATOR** CREeping RED FESCUE

### **THE Rx FOR DIFFICULT SITUATIONS**

- **TOLERATES SHADE**
- **RESISTS DISEASE**
- **CROWDS OUT WEEDS**
- **EXCELLENT IN MIXTURES**
- **ACCEPTS LOW TO HIGH FERTILITY**

In environments where other turf species fail, Navigator is often the prescription for success. Use it in shaded and poorly irrigated areas where fertility and pesticide inputs are either lacking or discouraged. Navigator is a denser, dark green variety that spreads aggressively to crowd out weeds.

Its color and leaf texture are very compatible with bluegrass and ryegrass in mixtures to improve shade tolerance under lower fertility levels.

Navigator quickly establishes, a bonus for slopes and other areas threatened by erosion. With only one or two annual mowings, it provides both substantial cover and visual attractiveness to golf course roughs, hillsides, and open turf areas.
