

PennTrio

Is Ideal For Tees, Fairways, Greens,
and Winter Overseeding

Some superintendents prefer combined strengths of several components for their bentgrass needs. Some were blending their own while others ordered mixtures from their distributor. PennTrio and Pennway are the only blends that may use Penn component names. Mixing 'Penn Pals' with any other species or bent variety will invalidate the use of Penn names as ingredients.

Oregon certified PennTrio contains 1/3 each Penncross, Penneagle, and PennLinks. This increasingly popular blend is ideally suited to permanent tees, fairways and greens as well as for winter overseeding. It has all the attributes of a blend with ready-to-seed convenience.
