

# SKYE'S The Limit!

Skye is the first choice of discriminating sod farms, homeowners, and turf professionals.

In the 2001 data of the NTEP trials Skye was deemed to have the strongest sod out of 173 varieties. For the sod farm this means quicker turnaround time in harvesting an elite bluegrass. The strong turf formed by Skye also allows for excellent wear tolerance. Homeowners will appreciate Skye's ability to quickly fill in, and the ability to rapidly recover from injury. Its reduced vertical growth habit translates into less frequent mowing, less clippings, and lower maintenance costs. Children and pets will love Skye for its ability to withstand their active lifestyles.

If you desire the best and demand a beautiful year-round lawn; then go ahead and reach for the Skye!

Resistance Rating	S	LR	MR	R	HR
Typhula Blight					•
Brown Patch					•
Stripe Smut					•
Necrotic Ring Spot					•
Anthracoze					•

S=Susceptible LR=Low Resistance MR=Medium Resistance  
R=Resistance HR=High Resistance

Skye can withstand mowing heights to 1/2 inch.\*
