

SUDDEN IMPACT

BLUEGRASS

ATTRIBUTES

★'s 5 = Outstanding, 4 = Very Good, 3 = Good, 2 = Moderate, 1 = Poor

★★★★★	Close Mowing	★★★★★	Summer Patch
★★★★★	Traffic Tolerance	★★★★★	Stem Rust
★★★★★	Turf Density	★★★★★	Dollar Spot
★★★★	Spring Greenup	★★★★★	Genetic Color

- **Sudden Impact** is a new addition to Jacklin's elite Kentucky bluegrass line-up and was thoroughly tested as J-2870.
- **Sudden Impact** provides exceptionally high quality turf at fairway mowing heights of ½" to homeowner mowing heights of 3".
- Extremely well adapted to all bluegrass climates in the Northeast, North Central, Intermountain West, and Transition zones.

PERFORMANCE HIGHLIGHTS

ELITE TURF PERFORMANCE: Widely adapted to full sun and light shade, coast to coast, **Sudden Impact** is a difference maker in blends and mixtures. Very dark green with beautiful turf texture...this variety makes an "impact" on quality bluegrass turf!

FAIRWAY TOUGH: With very strong establishment, **Sudden Impact's** 2006 NTEP performance excellent for density, traffic tolerance, and tolerance to fairway mowing heights. Added up, it makes for beauty and playability.

SUPERIOR TURF DENSITY: With exceptional year 'round density and strong summer persistence, **Sudden Impact** provides strong natural resistance to the establishment of weeds.

IMPROVED SPRING PERFORMANCE: Exhibiting good spring green-up and very little seedhead development, **Sudden Impact** will make a big difference in the spring quality of your bluegrass turf for home, sport, sod production and golf.

DISEASE PERFORMANCE: Recent 2007 NTEP data indicates very good overall disease resistance. In these trials, **Sudden Impact** exhibited very good resistance to summer patch and stem rust, with improved resistance to dollar spot and leaf spot.

IDEAL FOR BLENDS AND MIXES: **Sudden Impact** is an ideal component for blending with other elite Jacklin bluegrasses or for mixing with top performing Jacklin perennial ryegrasses, fine fescues, and turf-type tall fescue. It's excellent color, density and strong overall turf quality will complement and improve all mixes.

For Kentucky bluegrass blends: 2-3 lbs./1,000 sq.ft. (10-15g per sq. meter)

For Perennial ryegrass and fine fescue: mix to suite with 70-90% Sudden Impact.

For Turf-type Tall Fescue: 10-15% Sudden Impact improves uniformity, density and texture.
