50% Isodure®, 35% Methydure® & SOP
 Homogeneous professional turf fertilizer for
 greens and tees - Micro greens grade (SGN 100)

Product Features

- N-Fusion™ homogeneous micro-particle fertilizer provides uniform coverage.
- N-Fusion™ is an innovative technology of rapidly dissolving granules that minimizes mower pick-up with a light irrigation.
- 50% of the nitrogen is derived from Isodure™ isobutylidene diurea slow release fertilizer.
- 35% of the nitrogen is derived from Methydure® methylene urea.
- High rate of potassium. All the potassium is in the safer sulfate form.

Turf Benefits

- Methydure® slow release nitrogen is a trusted technology that has a gradual, consistent release and longevity that allows you to effectively feed turfgrass with fewer applications for up to 12 to 16 weeks.
- Micro-prill homogeneous fertilizer. Use of micro-prills results in an optimum distribution of fertilizer granules per unit area for a uniform nitrogen application and release.
- Provides a high rate of potassium for improved drought tolerance, greater disease resistance and improved wear tolerance.
- Potassium uptake is more efficient when applied in combination with nitrogen.
