# 50% Anuvia GreenTRX™ 50% Methydure® & SOP

Professional turf fertilizer for fairways. Mini fairway grade (SGN 145)

#### **Product Features**

- 25% of the nitrogen is available from GreenTRX™ technology which contains both ammonium-N and various organic sources.
- 75% of the nitrogen is derived from Methydure® methylene urea.
- Contains 1.2% iron.
- All the potassium is in the safer sulphate form.
- Phosphorus free.

#### **Turf Benefits**

- GreenTRX™ also provides amino acids and peptides which has been shown to positively impact soil productivity and plant growth.
- Methydure® slow release nitrogen is a trusted technology that has a gradual, consistent release and longevity that allows for the effective feeding of turfgrass with fewer applications for up to 12 to 16 weeks.
- Iron provides deep green colour without excessive top growth.

#### **Directions For Use**

- Read the entire label before use. Apply only as directed during the growing season. Apply only to dry foliage.
- Irrigate after application, especially during periods of high temperatures (28°C or above). Irrigating after application will accelerate initial green-up and will aid in the downward movement of granules into the turf canopy.
- Apply after mowing to prevent particle pick-up by mowing equipment. To further reduce particle pick-up do not collect clippings for one mowing after application.
- Nutrite encourages responsible use of our products. Help do your part in protecting our rivers and lakes by following label directives and cleaning driveways and walkways after application. Do not apply near water storm drains or drainage ditches, if heavy rain is expected or frozen ground.
