

SPRAY TANK DECONTAMINATOR

ALWAYS READ THE LABEL BEFORE USE

All Clear removes difficult to clean crop protection products like sulfonylurea herbicides and sticky formulations. **All Clear** uses dual modes of action to efficiently clean spray equipment.

- Surfactant to physically remove residues
- Degradant to chemically break down residues

Easy to use liquid formulation

Economical application rate

Reduce the risk from spray tank contamination

User friendly with no ammonia smell

Use Rate:

250 ml/100 L (1.1 L / 100 Imp. gallons) general purpose cleaning.

500 ml/100 L (2.2 L / 100 Imp gallons)
for decontamination

50 ml/10 L for nozzles and filters

Timing:

Immediately after spraying, drain tank, hoses and boom completely. Remove nozzles and screens from boom. Any contamination on the outside should be removed with washing with a fresh **All Clear**/water dilution (50 ml /10 L).

Rinse inside of tank of all visible residue. Fill tank ½ full with clean water and add All Clear. Agitate for 15 minutes, flush hoses and tank again.

Clean nozzles, screens and filters using the 50 ml / 10 L water rate. Rinse tank with clean water and drain tank completely.

Caution: Do not add bleach or chlorinating agents as toxic gases may be released. Contact with acids releases gases.

Package Size: 4 X 3.785 L

Additional: Co-developed with DuPont / FMC
