

# NEMAGARD™

WHITE GRUB CONTROL      CONTROLE DE GRUB BLANC

CONTAINS STEINERNEMA SCARABAEI: NATURE'S BEST DEFENSE AGAINST WHITE GRUBS.

## STORAGE INSTRUCTIONS

Store in original packaging in a cool, dark place. Avoid freezing and protect from direct sunlight. Shelf stable for up to three months without refrigeration. Refrigerate (8°C) to prolong shelf life.

## DIRECTIONS FOR USE

Remove all filters from the application equipment. Do not apply with pesticides. Mix entire contents of package with cool water to form a solution and stir occasionally to ensure thorough mixing. **BACKPACK SPRAYER APPLICATION:** Mix one package in 15L of water to form a solution. For each 2L of the solution, add 13L of water to treat 140 m<sup>2</sup> or 1,500 ft<sup>2</sup>. Repeat with rest of solution. **BOOM SPRAYER APPLICATION:** Partly fill tank with water. Start agitator and keep running until application is complete. Mix one package in 15L of water to form a solution and add to the sprayer tank. Fill tank with required volume of water and apply minimum 8L per 90 m<sup>2</sup> or 1,000 ft<sup>2</sup>.

**STANDARD RATE: ONE PACKAGE WILL TREAT 900 - 1,100 M<sup>2</sup> OR 10,000 - 12,000 FT<sup>2</sup>.**

## FOR BEST RESULTS

Apply mid-August to mid-October (for British Columbia, as early as July) when soil temperatures are between 12°C and 25°C. For curative treatments apply in the spring when soil temperatures allow. Apply during low light periods. Early mornings or evenings or cloudy sky conditions are best. Water the treated area directly after application with 3mm (1/8th of an inch) of water. Keep soil moist for up to two weeks after application for the nematodes to get established. Avoid applying to dry or over-saturated soil.

CONTENTS: MINIMUM 225 MILLION S. SCARABAEI BENEFICIAL NEMATODES. COVERS UP TO 1,100 M<sup>2</sup> OR 12,000 FT<sup>2</sup>.  
CONTENU: AU MOINS 225 MILLIONS S. SCARABAEI NÉMATODES BÉNÉFIQUES. COUVRE JUSQU' À 1,100 M<sup>2</sup> OU 12,000 PI<sup>2</sup>.
