

RS48-11D

Golf Greens Roller & Spiker

TRU-TURF

A Tru-Turf surface by design, not weight.

RS48-11D

Golf Greens Roller & Spiker

TRU-TURF - The original Turf Rolling Company are proud to present the latest version of their RS48 series roller, the RS48-11D Golf Greens Roller & Spiker, renowned for its ability to follow contoured greens with even ground pressure, utilizing **design not weight** to produce a TRU-TURF surface.

The RS48-11D has a power-train designed to handle the toughest of operating conditions, utilizing a Honda 6.5HP OHV engine & lighting coil (LED work-lights are standard) coupled to a heavy duty Eaton 11 hydro transmission, stainless steel reservoir & all steel piping.

The Drive Roller is non-stick, rubber coated, providing the traction needed for steep slopes.

The patented Tri-Roller rolling heads are equipped with heavy duty rollers that are double sealed and fitted with stainless steel roller bearings for longer life.

A balanced roller produces an evenly rolled turf surface and it's no coincidence just how well balanced the new TRU-TURF RS48-11D roller is.

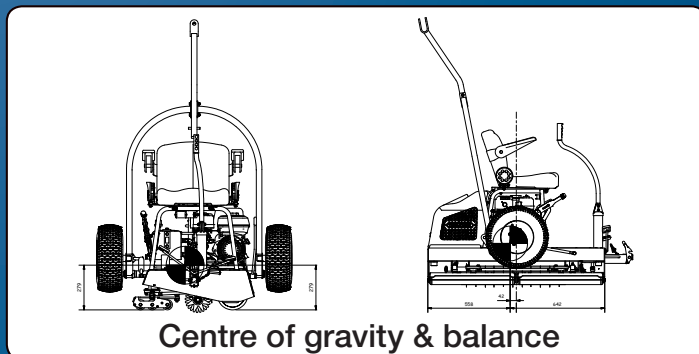

A designed-in low centre of gravity ensures roller stability and operator safety (see centre of gravity diagram below).

The unique but easily operated, built in Trailer includes heavy duty axles and trailer arms. When combined with the rugged but lightweight features of this officially licensed PGA golf greens roller, the RS48-11D is ready to take on the world's most demanding courses.

The RS48-11D is being used extensively on the PGA TOUR, Champions TOUR and National TOUR events.

Centre of gravity & balance

Built in trailer for rapid transport

Specifications	
Engine.....	Honda 6.5hp (4.85 kWatt) Isolation mounted
Transmission.....	Eaton 11 hydrostatic
Cooling.....	8 blade fan, cooling transmission
Oil Capacity.....	Transmission: 6qts (6.84L) Filter Engine: 1.05qts (1L)
Drive.....	1/2" (13mm) duplex chain, self adjusting
Drive Roller.....	Vulcanised rubber coated
Steering.....	Joystick directly connected to smoothing heads
Seat.....	UV protected with arm rests
Spikers.....	11 x 8 points to a depth of 1¼" (30mm)
Speed.....	Up to 11mph (18kph)
Trailer.....	Heavy duty, built in for rapid transporting
Footprint.....	3.5 psi (24.13 kPa)
Swath.....	2 x 24" (600mm) Split heads = 48" (1200mm)
Lights.....	12v LED Lights
Weight.....	624lb (283kg) Crated: 712lb (323kg)
Options.....	Sweeper kit Cast iron spiker
