## A E R A T I O N

V e r t i - K n i f e

# 1600

The Verti-Knife 1600 runs round discs of different diameters and configurations through the soil, up to a depth of 6" (150mm). The movement of air, water and nutrients is encouraged throughout the critical root zone area. This results in vastly improved root density and rooting depth.

FEATURE	BENEFIT
Fewer moving parts	Low maintenance
Unlimited working speed	High productivity
Variable depth & spacing	Use 1 machine for all turf applications
Continuous slitting	Destroy thatch & black layer while improving drainage
Cleaner operation	Little or no surface disruption, doesn't stop play

A E R A T I O N

# Verti-Knife 1600

SPECIFICATIONS	DESCRIPTION
Working width	63" (1.6m)
Total width	79" (2.0m)
Weight	880lbs (400kg)
Tractor required	25HP with lift cap. 1,100lbs (500kg)
Standard Items	- Double axles/ rows of discs for intense surface aeration. - Rear roller
Working depth	1.6" (40mm)
Disc diameter	8" (200mm)
Disc thickness	3mm
Disc spacing	2" (50mm)
Options	Axle for Deep Aeration
Optional working depth	1-6" (25-150mm)
Optional disc diameter	18" (450mm)
Disc thickness	4mm
Number of discs	6
Optional disc spacing	12" (300mm)
