Verti-Quake

# 2521

The Verti-Quake is a rotary aerator that decompacts the soil using a set of rotating steel blades. As these blades cut cleanly through the soil, they create a wave action that shatters compacted areas and opens up the subsoil. The Verti-Quake is available in multiple models and can work at depths up to 15" (380mm) with little or no surface disruption.

FEATURE	BENEFIT
Fewer moving parts	Low maintenance
Unique wave action	Full decompaction
Deep penetration	Vastly improves drainage & drought resistance
Choice of 4 models	The right machine for every tractor
Simple design	Ease of operator training
Easily adjustable depth control	Adjust in the field without tools

# Verti-Quake 2521

SPECIFICATIONS	DESCRIPTION
Working width	83" (2.1m)
Working depth max.	10" (250mm)
Weight	1,521 lbs (690kg)
Tractor required	35 hp, lift cap 1,874 lbs (850kg)
3-point connect	cat 1 and 2
Capacity (max)	33,906 sq ft/hr (3,150 sq m/hr)
Number of Blades	24
Blade thickness	1/2" (12.7mm) tapered
Blade spacing	10" (250mm)
PTO Speed	540 rpm
Operation Speed	0.3 - 1.0 mph (.48-1.6 kmh)

## Tine Selections

The Verti-Quake utilizes a set of rotating knives bolted to the main rotor. Refer to the listing for sizes and options by model.
