AMAZING performance!**

A leaf & debris collector designed to be towed behind  
lawn & garden tractors.

The AgriMetal Collector is a stand-alone unit with  
an independent pickup head featuring a rotative flails.

**Commercial strength sweeper/vac at an affordable price**

## AgriMetal

# Leaf & Debris Collectors 4413 & 4420

AgriMetal's creative designers built a large diameter impeller and put it inside the pickup head.

Leaves and debris are sucked into both sides of the impeller and has only a few inches to travel to the hopper. So, as a result it's like having 2 blowers housing and 2 impellers on each collector.

The 22 inch diameter impeller offers the following additional benefits :

- Longer longevity because it is turning slow.
- Slower RPM means quiet operation (low decibel).
- A low RPM means less dust being raised.

AgriMetal collector feature an innovative rotor with super light nylon flails that lift up the leaves, thatch and even picks up pine straws out of the fine turf.

The nylon flails are very effective even in the tall grass and yet so gentle that it will not mark the turf.

Optional: Heavy duty nylon bristle brush which offers exceptional performance for spring cleanup and quick & easy grass collection in summer months. Switch from flails to bristles in minutes !

Also available, an optional mulching kit to break up leaves so as to load more into the collector for less trip to the dump site.

Pick up leaves

Pick up pine straw

Pick up thatch

# Leaf & Debris Collector

**To hitch :** As simple as dropping a pin through the hitch, no needs to connect to the mower.

**Unloading :** A manual or hydraulic apron offered as an option, unload the hopper quickly scraping the floor clean even when loaded with wet clipping or and leaves.

**Manoeuvrability :** Compact design allowing unparalleled access to areas others cannot reach.

2 Models to fit your cleanup needs

**Model 4413**  
1.3 cubic yard holding capacity is the perfect choice for a medium size area. Easy to handle and low enough to pass under tree branches.

**Model 4420**  
2 cubic yards holding capacity for larger area. Feature a 7.5 HP engine w/electric start.

Optional: hydraulic apron for fast & easy unloading available on the 4420 only.

Capacities: 2 yards = 54 cubic feet  
1.3 yard = 35 cubic feet
