

Myco-Mg

Magnesium and calcium amendment with beneficial Mycorrhizae.

Mini particle size

Product Features

- Contains beneficial mycorrhizae.
- Organic fertilizer derived from aerobically composted turkey litter.
- Myco-Mg breaks down and releases nutrients after irrigation.
- More cost effective than a liquid application.

Turf Benefits

- Mycorrhizae form a network of filaments that associate with plant roots and draw nutrients from the soil. Without these filaments the root system would be unable to access these nutrients. The fungus-plant relationship stimulates plant growth and accelerates root development.
- Mycorrhizae improve rooting, Increase drought tolerance and optimize nutrient assimilation
- Applications of mycorrhizae improve overall plant health, drought and disease resistance throughout the growing season.
- Beneficial for amending soils that are low in magnesium and medium to high in calcium that do not require significant neutralization of soil pH.
- Aids in balancing soil levels of magnesium and calcium for improved growth and stress tolerance.

Guaranteed Minimum Analysis

		%
Calcium	(Ca)	14.5
Magnesium	(Mg)	20.0

Application Rates

Bag kg (lb)	Area Covered m ² (ft ²)	Nutrients supplied		Application rate kg/100 m ² (lb/1000 ft ²)
		Ca	Mg	
20 (44)	400 (4400)	0.73 (1.45)	1.00 (2.00)	5.0 (10.0) in the spring or fall

Follow soil test recommendations for application rates. Do not over apply.
