

Gypsum

Premium granulated calcium sulfate
Mini and regular particle size

Product Features

- Nutrite pelletized Gypsum is an efficient, fast acting and effect method of supplying available calcium and sulfur to the plant. Can also be applied to counteract problem soil conditions.
- Nutrite pelletized Gypsum is produced from high quality mined calcium sulfate and finely ground to insure optimum availability.
- Nutrite Gypsum breaks down rapidly with light irrigation.
- Low dust content.

Turf Benefits

- Gypsum is a good soil amendment where calcium deficiencies exist on neutral pH soils.
- Gypsum is beneficial in leaching soluble salts from the root zone where irrigation water salinity is excessive.

Guaranteed Minimum Analysis

		%
Calcium	(Ca)	27.0
Sulfur	(S)	22.0

Application Rates

Bag kg (lb)	Product application rate
25 (55)	Follow soil test recommendations for application rates. Do not over apply. Over application can result in a soil nutrient imbalance involving potassium, magnesium and calcium.
