Harrell's SprayMAX[®]

GENERAL INFORMATION

PAR[®] SG is a highly concentrated and stable pigment designed to improve the appearance of turf and provide a visual spray pattern identification for the applicator. The proprietary blend in PAR[®] SG will aid in more uniform applications of turf chemicals, including foliar fertilizers, plant growth regulators (PGRs), plant protectants, and herbicides. Highly concentrated formulation for maximum performance

RECOMMENDED RATES

Apply at a rate of 8 – 16 oz. per acre (0.18 – 0.37 oz./1,000 sq.ft.) in 40 – 50 gallons of water. For turf at mowing heights of ½" or greater, apply 8 – 10 oz./acre in each of two directions.

For covering bermudagrass or zoysia fairways, tees, or sports turf prior to winter dormancy, make an initial application of 10 - 12 oz./acre in each of two directions after recovery from the first frost of the autumn. Apply to green turf for optimal results. Make subsequent applications of 10 – 16 oz./acre as needed.

STORAGE AND CONTAINER DISPOSAL

Store above 45°F. Store this product in a dry place, in original container only. Keep lid tightly closed. Keep away from open flame or intense heat. Triple rinse container and offer for recycling, if available, or dispose of in accordance with federal, state and local authorities.

CONDITIONS OF SALE

Seller warrants that products will be labeled as required under state and federal laws and that they conform to the label description. Any non-conformance must be reported in writing to Seller within Thirty (30) days after purchase as a prerequisite to maintaining any claim against Seller. Buyer agrees to inspect all products purchased immediately upon delivery. The seller's liability under this warranty is in lieu of all other warranties, expressed or implied, including warranties of merchantability and fitness for a particular purpose. There are no warranties which extend beyond this statement.
