

TD65 **Tri-Deck Finishing Mower**

Superior Quality - Superior Cut

The Progressive **TD65** is a Tri-Deck rotary finishing mower providing a 15.5 foot cut. The **TD65** is both operator and maintenance friendly and it has become the choice of sod professionals for mid-size operations for many years.

The three independent floating decks are mounted on a robust transport frame. These decks conform to and follow most undulations and other ground conditions. By using your 30-50 H.P. tractor the **TD65** can mow up to 90 acres in an eight hour day. Field proven, Maintenance Free Blade Spindles offer peace of mind and lower cost of operation.

The superior cut is the result of our deck design. High lift rotary blades create enough vacuum to lift the grass for a smooth, even cut and then disperse the clippings evenly through the rear discharge system which is unique and an integral part of the deck design. The result is a superior after cut appearance.

Only minutes are required to change cutting heights from 1" to 5" without the use of tools. In addition, all operating functions for transport and mowing positions are activated from the tractor seat.

The **TD65** is another example of the ingenuity and quality that goes into producing a durable, reliable, rotary finishing mower that is easy to maintain. The **TD65** is not only of superior quality, providing a superior cut, it is "The Better Built Choice".

The Better Built Choice.™

Maintenance Free Blade Spindles :

Developed and tested over several years, Progressive TD65B incorporates maintenance free blade spindle assemblies as standard equipment. Completely interchangeable with a greased spindle, the same housing is used providing wide spacing between the bearings ensuring low bearing loading and long service life. Maintenance free blade spindles not only protect the owner's investment from a missed service, it also reduces overall maintenance time and costs.

A superior cut for a superior finish:

High lift rotary blades create enough vacuum to lift the grass for a clean even cut and then disperse the clippings evenly through the rear of each deck for a superior after cut appearance. An optional mulching kit is available to help return clipping nutrients to the soil. High flotation tires support each floating deck ensuring good ground contour tracking without the fear of soil compaction.

Designed for the real world:

Progressive designed the TD65B mowing deck to provide even dispersion of clippings through the open rear discharge area - avoiding clumping and windrows. Only minutes are required to change the TD65B cutting height from 1" to 5" without the use of tools. For convenience and safety, all transport and mowing functions are activated without the operator leaving the tractor's seat.

TD65B Tri-Deck Finishing Mower Specifications

Part Number:	526515B	Cutting Height:	1" to 5" in 3/8" steps
Cutting width:	15.5 feet	Weight:	2720 lbs
Recommended PTO HP:	30-50	Transport Width:	8.5 feet
Mowing Capacity:	2 mph 3.7 acres / hour	Transport Height:	7.5 feet
	4 mph 7.5 acres / hour	Transport Length:	14 feet
	6 mph 11.3 acres / hour		
Turning Radius:	0" uncut circle (zero turning radius)		
Transport Tires:	Two 18 X 9.50 X 8 NHS, 6 ply, Turf Saver Tires, Optional road transport tires available
