

TDR-15B **Tri-Deck Roller Finishing Mower**

Versatile and Productive

Progressive's 15½ foot **TDR-15B** Tri-Deck Roller finishing roller mower is an ideal choice for municipal grounds care, parks, sports facilities, polo fields, or estates, in either wet or dry conditions.

This versatile mower can cut as low as ½ inch. Full width rollers smooth the field surface and stripe for a pleasing visual impact. The rollers can speed divot repair, promote root-to-soil contact, aid plant health and help moisture retention.

The superior quality cut comes from high lift rotary blades that create enough vacuum to lift the grass for a clean uniform cut and then disperse the clippings evenly over the rollers. Easy access to height adjusters makes setting the height of cut quick and precise. Rear rollers also provide extra protection for the discharge of clippings and debris. Progressive's exclusive **Pro Lift-N-Turn™** is standard equipment — this allows the decks to be temporarily lifted slightly off the ground with the PTO still engaged and without fear of driveline damage.

The **TDR-15B** is another example of the ingenuity and quality that goes into producing a durable and productive rotary finishing mower that is easy to maintain. The **TDR-15B** not only provides versatility of use and quality of construction, it is "The Better Built Choice".

The Better Built Choice.™

Grounds Keeper Series

Pro Lift-N-Turn™

The productivity advantage of Progressive's exclusive **Pro Lift-N-Turn™** system is standard equipment. Operators have the ability to slightly raise the decks off the ground with the PTO still engaged, making turning easier on the turf and the operator more productive. An automatic stop prevents the decks from raising too far. The result is less ground damage from dragging the rollers across the turf. Progressive's **Pro Lift-N-Turn™** has simply eliminated the issues competitive roller mowers face when making sharp turns.

Easy change height adjustment:

Infinite cutting height adjustment from ½" to 4" is easily accomplished with the supplied tool allowing quick transition between multiple mowing height applications. The durable design resists rusting and wear.

Full length rollers:

6" diameter rollers running the full length on both the front and rear of each mower deck, helps to smooth the mowing surface while cutting. The rollers also helps promote healthier turf. The rollers can also stripe the turf for a pleasing visual impact - a testament to the professionalism of the job.

Simpler Maintenance = Lower Cost:

Maintenance Free Blade Spindles and 100 hour greasing interval PTO shafts are used to both lower cost and time spent on routine maintenance. They also provide peace of mind that a missed daily greasing won't render the mower out of service.

C.V. Equipped Input PTO:

Progressive has equipped the TDR-15B with a constant velocity (CV) input PTO as standard equipment along with an auto-lock PTO coupler. This makes connecting the mower to a tractor easier, greatly reducing the overall connection time. CV joints also extends service life of the entire driveline as they minimize driveline induced vibration that may occur during turns.

TDR-15B Tri-Deck Roller Mower Specifications

Part Number: 528750B painted deck shells
Cutting Width: 15.5 feet
Mowing Capacity: 2 mph 3.75 acres per hour*
 4 mph 7.5 acres per hour*
 6 mph 11.3 acres per hour*
Transport Tires: P275 / 60R 15 Automotive radials

Recommended PTO H.P.: 30 to 50
Transport Width: 97"
Transport Height: 7' 10"
Transport Length: 14'
Operating Weight: 3,725 lb.

*Assumes no overlap or turning
